Two prestigious awards for research paper : "C16orf57, a gene mutated in poikiloderma with neutropenia, encodes a putative phosphodiesterase responsible for the U6 snRNA 3' end modification" published in „Genes and Development” last year. There are four researches from CeNT among the authors of this article : Joanna Krwawicz, Jan Kutner, Michał Łązniewski i Krzysztof Ginalski.

The publication has been awarded two prizes granted by Polish Biochemical Society :

1. Award named J.K. Parnas for the best experimental work in biochemistry or molecular biology made entirely in Polish laboratory
2. Award for the best experimental or theoretical work in chemistry and biochemistry of nucleic acids, made mainly in Poland.
