

## **New Laboratories at CeNT UW: Chemistry and Computational Biology**

We have received 16 applications in Chemistry and 7 in Computational Biology from candidates from over the world. The first stage of the recruitment process was a preliminary assessment of professional achievements and scientific plans of candidates based on the presented documents. We have invited external experts in the respective fields from France, Poland and the USA, to evaluate the applications. The top ranked candidates were invited to present their research interests during the scientific symposium and individual interviews. Finally, the Council of CeNT UW recommended the candidates, who subsequently will be appointed by Prof. Agnieszka Chacińska CeNT UW Director to become Research Group Leaders at CeNT UW.
