

ReMedy: Group Leaders recruitment 2018

The first open call for the Research Group Leaders got a significant recognition – we got 27 applications. The first stage of the recruitment process was a preliminary assessment of professional achievements, scientific plans of candidates and how they fit to ReMedy programme. The evaluation was performed by the Council of CeNT UW/ReMedy International Scientific Committee. The top ranked candidates were invited to present their research interests during the scientific symposium and individual interviews. Finally, the Council of CeNT UW/ReMedy International Scientific Committee recommended the candidates, who after negotiations will be appointed by Prof. Agnieszka Chacińska CeNT UW Director to become Research Group Leaders.
